EI Compressed Air Technologies is a Manufacturer of Filtration, Drying, and Purification Systems.

Compressed Air Treatment is the last line of defense to protect critical air components from contaminants such as oil, water, and particulates.

EI represents seven different twin tower adsorption designs: Heatless, Externally Heated, Heat of Compression, Blower Purge, Breathing Air Purifier, Exhaust Purge, and Single Tower Air Dryer.

We also specialize in Zero Air Generators, Refrigerated Air Dryers, and Point of Use Drying Systems.

EI also represents three different breathing air systems to meet OSHA Grade D and CSA requirements.

EI offers a wide variety of replacement elements, air drying systems, and filter regulators. Compressed Air filtration products are designed to help remove liquid water, water vapor, solid particulates, and oil, etc.
